

Polyfloor PFT-215-2K SF

Trembesi Tower is a mixed-used building located in BSD City Tangerang that offers upscale office spaces within Trembesi Suites and quality accommodation and hospitality service in Trembesi Hotel. Certified as a Green Building by Green Building Council Indonesia landed them GBCI's first gold standard mixed-use development in BSD City.

A high profile building must be supported with a good parking lot facilities because car park is one of the first impression that can define the image of a building. Vehicle owners prefer to park in light, bright parking environments. To provide the best parking facilities, they have decided to coat the car park area instead of leaving it with only bare concrete.

Over 10,000 m² of Polyfloor PFT-215-2K SF installed at the parking bay and driveways. Consist of 4 grade suspended slab car park, our Polyfloor PFT-215-2K SF have given the best concrete protection from engine oil, fuel, and similar substances that might affect car parking facilities.
