

Tennokote Running Track Pro System

Pekan Olahraga Mahasiswa Nasional (POMNas) is an inter-provincial national sports event for undergraduate and diploma students in Indonesia which is held every 2 years. On November 2022, POMNas XVII was attended by 10.000 athletes from all across 34 provinces in Indonesia. To welcome this event, Padang State University as a home for Sports Science Faculty required improvements for a few things and one of the essential is the running track. They must meet the International standard for the records to be recognized. Propan's Tennokote Running Track Pro System was selected due to its UV resistance, all weather steady performance, high elasticity, high durability which is suitable for competitions that requires international standard.

TENNOKOTE RUNNING TRACK PRO SYSTEM is a running track system made from Polyurethane (PU) elastic layer with Ethylene Propylene Diene Monomer (EPDM) rubber, mixed with Polyurethane (PU) wear coat paint.

This 6500 m² running track project took 3 months to complete and was finished in time for inauguration by the State Minister for Youth and Sports Affairs (Menpora) , Mr. Zainudin Amali. As the first international standard running track in Sumatera Barat, the Dean of Padang State University have been given high appreciation from the State Minister for Youth and Sports Affairs as he dare to take the challenge and bring the facility to the next level.
