

At Orientop, we take pride in delivering comprehensive solutions for shower cubicles, encompassing design, fabrication, and installation services that transform ordinary bathrooms into functional sanctuaries.

As the authorized distributor of DOWSIL™, we recognize the significance of providing glass supplies and installations that are not only safety and visually appealing but sustainable, healthy and well-being, sturdy and long-lasting are equally essential for interior decorations. For this reason, we incorporate DOWSIL™ silicone sealants in our installation procedures to achieve exceptional high bonding and sealing performance.

We have proudly supplied and installed glass for many landmark projects include NOVO LAND, the largest private residential development in Tuen Mun's history. Merging interior elements inspired by vibrant and health-conscious styles, we installed approximately 5,400 shower enclosures in NOVO LAND using the environmentally conscious DOWSIL™ Green Multiple Purpose Silicone Sealant for achieve ultimate sealing performance.

In pursuit of creating a revitalizing space for leisure and wellness, sealing shower cubicles with DOWSIL™ Green Multiple Purpose Silicone Sealant boasts a comparatively low environmental footprint in contrast to many other sealant varieties. Composed of a high percentage of renewable content, this sustainable and eco-friendly option features low VOC and minimal odor, rendering it safe for use in both residential while preserving optimal indoor air quality. This sealant helps to minimize the ecological impact of construction without compromising on strength and durability.

By collaborating with DOWSIL™, Orientop is able to provide our clients with the utmost quality and dependability in our glass installations. The use of Dowsil silicone sealants not only ensures the longevity of our products but also provides a superior finish that enhances the overall appearance of the glass.
