

Kwong Ming Ying Loi School

Greentins Group is a leading innovator in Hong Kong's environmental industry, focusing on developing eco-friendly solutions. Since 2005, Greentins has built a reputation for quality and reliability, with award-winning carbon capture solutions and sustainable wood composite materials. Our mission is to create a sustainable environment by promoting clean, carbon-free practices through our proprietary patented innovative technology and collaboration. Greentins is rapidly expanding, establishing new offices in Qatar and Dubai since 2023. Our primary focus is on deep green technology and reducing carbon emissions. We value employee satisfaction and uphold corporate social responsibility by contributing to global sustainability. Aligned with The Paris Agreement, we aim to achieve net-zero emissions by 2050 through partnerships and global efforts to combat climate change

Our most recent project involves installing the GT-Microalgae Living Wall at a primary school in Yuen Long. This installation marks the company's first in an educational institution, contributing to the creation of a sustainable green campus.

Kwong Ming Ying Lai School is famous for its dedication to environmental education and building a green campus. The school firmly believes in Greentins' advanced technologies, which purify the air and reduce carbon emissions while enhancing the aesthetics of the school's environment. This eco-friendly system has become popular among students and parents, and it also provides opportunities for learning.
