

Nestled in the vibrant heart of Orchard Road is the newly opened Pan Pacific Hotel.

Sunscreen (Singapore) Pte Ltd is proud to have been part of making the design concept come alive in the eventual built product, with our Rollite Rolzip at all balconies and Rollite Drapery for all interior spaces.

Space is of paramount concern in Singapore due to land scarcity, and much more so in the prime shopping belt of Orchard Road. With Rollite Rolzip, we were able to facilitate bringing the indoors out, by increasing nett usable space within an otherwise smaller room area, allowing space usage to flow smoothly into the outdoor balcony. Where Rollite Rolzip shields off heat from the noon day sun, whilst maintaining cool interior temperature of the guest rooms. Rain is also effectively kept out, with the proprietary fabric being fully waterproof, yet translucent to ensure visual connectivity with exterior day lighting conditions.

Rollite Rolzip was selected after a series of tests, encompassing strength, fire resistance, thermal transfer properties and aesthetics, in line with what the architects envisaged, for a safe, effective and eye-catching fabric barrier at the balconies.

Rollite Drapery complemented the interiors, with textures and colours selected to best elevate the vertical surfaces of each area, from the guestrooms to function rooms. Testament to how artfully selecting drapery materials with the right partners, can accentuate the overall interior design.
